Agricultural Statistics of India

1919-20

VOLUME II—INDIAN STATES

Introductory Note

This volume deals with statistics for Indian States as far as reported. ^{General} As in the previous issues, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States, and the totals for all the reporting States. The total number of cattle as far as reported in each of the years 1906-07 to 1919-20 has also been included in the general summary table (No. 1). These statistics are defective for comparative purposes, as additions have been made in the number of reporting States from time to time. The States of Hyderabad, Benares, Bharnagar, Dharampur, and Bagli have for the first time furnished figures for 1919-20. Explanatory notes have been inserted at the foot of the tables. In the present issue the former Table II (classification of area) has been split up into two separate tables, viz., Table II—Classification of Area, and Table III—Area under Irrigation; while Table VI—Transfers of Property in land—has been abolished. Details for ten years have been added in each table for groups of States. Two charts and an index for easy reference have been added to the volume.

It should be noted that, for the reasons explained below, the agricultural statistics of Indian States are incomplete and are of far less accuracy than those of British Provinces published in Volume I. The question of the improvement of the statistics of Indian States has been taken up by the Government of India, and it is expected that more complete and accurate statistics for them will be available in the near future. As these States comprise one-third of the total area of India, the importance of their statistics in the all-India returns can scarcely be over-estimated.

The total area of Indian States is approximately 496,000,000 acres (775,000 square miles), with a population of 70 millions according to the census of 1921. These are divided for the purposes of agricultural statistics into two main classes, namely, (1) States within the jurisdiction of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States within the jurisdiction of Local Governments and Administrations.*—The total area of these States is 181,061,000 acres, with a population of about 30 millions. They are divided into the following main groups:—

	Area Thousand acres	Population Thousands
Bombay and Sind States	40,878	7,412
Madras States	6,803	5,460
Punjab States	24,511	4,415
Bihar and Orissa States	18,335	3,965
Central Provinces States	19,960	2,068
North-West Frontier Province States (including Tribal areas)	16,380	2,585
Burma States (including Shan States)	38,402	1,521
United Provinces States	4,348	1,185
Bengal States	3,477	896
Assam States	7,970	381
Total	181,061	29,814

The total area of all these States (with the exception of the greater part of the South Shan States and Karenge in Burma and the Tribal areas in the

North-West Frontier Province) is included in the areas of the respective British Provinces stated in column 2 of table I of Volume I (British India), but is shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume. Of these States, agricultural statistics are at present available only for the following thirty-six States in the Madras and the Bombay Presidencies, the Punjab, and the United Provinces, and are dealt with in this volume:—

Baluchistan (Native)	51,462	370
Sikkim	1,804	82
Total	314,726	40,195

No agricultural statistics are at present available for Baluchistan (Native), and Sikkim. Of the remainder, returns are received from the following twenty-two States:—

	Area Thousand acres	Population Thousands

Total	217,257	36,627

The total area of all the fifty-eight reporting States * named above amounts to 251,181,000 acres, with a population of about 47 millions. These States, therefore, represent 51 per cent of the total area, and 67 per cent of the total population, of all the Indian States.

The earliest years from which the statements of agricultural statistics have been received from these fifty-eight reporting States are noted below :—

Mysore	1886-87
Jaipur	1892-93
Gwalior	1896-97
Bikaner, Marwar, Tonk	1898-99
Alwar, Bharatpur, Kishangarh, Jhalawar, Kotah	1900-01
Indore, Rajgarh, Narsingarh, Nagod, Patiala, Jind, Nabha, Bahawalpur	1907-08
Pudukkottai, Banganapalle, Sandur, Cochin, Travancore, Bhopal, Barwani, Simur, Kalsia, Pataudi, Lohara, Dujana, Kapurthala, Malekotla, Faridkot, Simla Hill States (12 in number)	1908-09
Kashmir	1910-11
Baroda, Bundi, Phaltan, Amudh, Sachin, Jath	1918-19
Hyderabad, Benares, Bhavnagar, Dharampur, Bagli	1919-20

The returns for the different States relate to the years ending on the dates stated below, so far as information is now available :—

Bikaner, Sandur, Banganapalle	year ended 31st March
Jath, Phaltan	" 6th June
Mysore, Baroda, Pudukkottai, Cochin, Travancore, Gwalior, Indore, Narsingarh, Nagod, Bikaner, Kishangarh, Bharatpur, Kotah, Bagli, Patiala, Amudh, Dharampur, Benares	" 30th June

Tonk, Rajgarh, Alwar	" 31st October

From the total area of all the fifty-eight reporting States (251,181,000 acres), deduction must be made of 121,219,000 acres for which statistics are Table I,
Total area

(a) Related to Census of 1911

* Statistics of live stock (Table V) are furnished by a few other States which do not furnish statistics for the other tables. On the other hand, some of these fifty-eight reporting States do not furnish figures for live stock (Table V), nor for land revenue (Table VI).

not available. These comprise chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures. The net area actually covered by these statistics is, therefore, only 129,932,000 acres by professional survey,* or 128,923,000 acres according to village papers.†

Table II,
Classification of area

This area is classified, for the purposes of agricultural statistics, as shown in the margin			About
	Thousand acres	Per cent	16,151,000 acres, or 12.1 per cent of the total, are occupied by forests; and the area not available for cultivation, that is, land absolutely barren, or unculturable, or covered by buildings, water, and roads, or otherwise appropriated to

uses other than agriculture, amounts to 22,462,000 acres or 17.1 per cent. The balance, 90,756,000 acres or 70.2 per cent, represents the area available for cultivation. Of this, 16,867,000 acres, or 13 per cent of the total area, represent culturable waste, i.e., land available for cultivation but not taken up, and 11,133,000 acres, or 11.1 per cent, were kept fallow in the year under report. The net area actually sown in the year was thus 59,756,000 acres (16.1 per cent of the total area). This net area sown, however, excludes areas sown more than once in the year. If areas sown more than once (as noted below) are taken as separate area for each crop, the gross area sown in the year of report amounts to 61,223,000 acres.

Table III,
Area under irrigation

The total area irrigated in the reporting States during 1919-20 was 8,309,000 acres, as against 6,200,000 acres in the preceding year. Of this, 2,358,000 acres were irrigated from Government canals, 797,000 acres from private canals, 1,167,000 acres from tanks, 1,927,000 acres from wells, and the remaining 1,760,000 acres from other sources of irrigation. These figures, however, do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas sown more than once are counted as separate area for each crop, the gross area of irrigated crops amounts to 10,156,000 acres. Of this area, 9,131,000 acres were under food crops.

Table IV,
Area under crops

The gross area cultivated with crops in the reporting States was, as stated above, 64 million acres in 1919-20. The different classes of crops and the area occupied by each, so far as details are available, are stated in the margin. Of the total area sown, food crops occupied about 91,658,000 acres or 78.3 per cent and non-food crops about 13,770,000 acres or 21.7 per cent.			Of the food-crops, food grains (cereals and pulses) occupied as much as 47,253,000 acres, or 74.5 per cent of the total area sown and other food crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food crops together) covered some 2,105,000 acres, or only 3.8 per cent of the total. Of the non-

food crops, oilseeds occupied 3,811,000 acres or 6 per cent of the total area sown, fibres such as cotton, hemp, etc., 6,201,000 acres or 9.8 per cent, and fodder crops 1,890,000 acres or 3 per cent. The other non-food crops, namely, dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), and miscellaneous non-food crops together, covered some 1,862,000 acres or 2.9 per cent of the total. Statistics for the premier State of Hyderabad have been received for the first time and are included in the present issue. No comparison has therefore been made with previous year's figures, as the inclusion of Hyderabad has nearly doubled the figures.

* For explanation of the terms "professional survey" and "village papers," see footnote to Table I (page 6) of this Volume and the Note prefixed to Volume I.
† See footnote (c) on page 23 of the Table.

The total extent of land on which more than one crop was raised during the year was 1,467,000 acres.

Table V is prepared by forty-five States, namely, Hyderabad Mysore, Baroda, Pudukkottai, Banganapalle, Sandur, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bagli, Bikaner, Marwar, Jaipur, Kishangarh, Alwar, Bharatpur, Jhalawar, Tonk, Kotah, Bundi, Jath, Phaltan, Aundh, Sachin, Bhavnagar, Dharanpur, Benares, Jhabua, Jobat, Sailana, Ali-Rajpur, Piploā, Dewas (junior) Mailar, Chhatarpur, Dhar, Rutlam, Panna, Trarancore, and Karpurthala. According to the latest statistics, the total number of live-stock of the bovine class (bulls, bullocks, cows, buffaloes, and young stock, *i.e.*, calves and buffalo calves) is 31,381,000, that of the ovine class (sheep and goats) 19,381,000, and that of horses and ponies, mules, donkeys, and camels 921,000. The numbers of ploughs and carts are 3,987,000 and 1,201,000, respectively.

Table VI (Land Revenue) is prepared by twenty-seven States, namely, Hyderabad, Mysore, Pudukkottai, Banganapalle, Sandur, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bikaner, Marwar, Jaipur, Alwar, Bharatpur, Jhalawar, Tonk, Kotah, Bundi, Jath, Phaltan, Aundh, Sachin, and Benares.

The Appendix explains the vernacular terms used in this volume, and the charts illustrate (1) the classification of the total area showing the proportion of cultivated and uncultivated lands, and (2) the total area sown in 1919-20 with shares of food and non-food crops.

Column 2—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in Southern India. In State where there has been no professional survey, the figures are based on the best available information.

Column 3—In this column is deducted the entire area for which the statistics required for Tables II and IV are not forthcoming in whole or in part. This area comprises chiefly estate held on privileged tenure, which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organization of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and IV is correspondingly increased.

Columns 4 and 5—Column 4 is a check on the accuracy of column 3. In the latter, "village papers" mean "the papers prepared by the village accountants." In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily reported in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in blocks, the area by village papers represents the total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns.

(a) See footnote (b) on page 18.

(b) Previous year's figure repeated [vide footnote (a) on page 18].

(c) Column 3 states the area of unsurveyed forest.

(a) Column 2.—As there has been no revenue survey so far, this column states the area of the State according to the best available information. Column 3 states the areas of jagir and musaf villages, the boundaries of which have been demarcated, but for which the statistics required for other tables are not available. Columns 4 and 5.—In the absence of any revenue survey data, the figures in column 5 are repeated in column 4.

(b) Column 3 states the area held by jagirdars and musafdar, as well as the musaf plots in khalsa villages for which no separate record is maintained.

Column 2.—The definition of the term "forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown), an explanation being given in a note.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to use other than agriculture.

Column 4 includes groves not classed in the area sown. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

(a) The statistics collected in 1908-09 have been repeated up to 1912-13, as fresh information could not be collected owing to pressure of work connected with the revenue settlement of the State.

(b) Column 2 states the area of reserved forests within surveyed villages.

(c) Includes 8,215 acres in coffee estates.

(d) See footnote (c) on page 23.

(a) Column 2 states the areas of forests left unreserved. Forests in this State not having been demarcated, figures in columns 3 and 4 also include reserve forest areas. Column 1 states areas of land left uncultivated for over three years of bar (grass lands) and of pasture lands. Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is three years.

Column 2 states the areas of state and district forests and of plantations.
Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.
Column 4 states unoccupied assessed waste.
Column 5—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture, but the exact area of all such lands cannot be ascertained although it cannot be large.

Columns 8 to 19 state the gross area of irrigated crops, area sown more than once being counted as separate areas of each crop. This accounts for the excess in some cases of the total area of crops irrigated (column 19) over the total area irrigated (column 7)

(a) Included in column 16

(b) Incomplete

(c) Includes 120,384 acres for which details are not available

Note.—In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to ill-failure of the first sowing, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities.

NOTE.—Until 1898-99 statistics were collected every year by the *shasiboy* and *pattel* of each village by enquiry or inspection. Since that year a census has been taken every five years as nearly as possible simultaneously throughout the State. The last census was taken in January 1921. Live-stock in municipalities are included.

* These are *Lkalsa* or state lands only. The whole area of the State according to the census of 1911 is stated in Table I—No. 5** *Alwar*—The classes of tenure are zamindari and village communities, the former comprising *zamindari-dil-namal* and the latter *patidari* and *bharyachara*. Item 1 states the area by village papers (column 5 of Table I). Item 2 (a) shows areas covered with forests (column 2 of Table II) which are wholly revenue-free† *Jhalawar*—The whole area stated in this table is classed as "Khatadari" and "Watendari" equivalent to "Rajyatwari" and "Zamindari" respectively. Item 1 excludes entire villages held by jagirdars and udkadars

Column 4 (b) states, not only the area actually under crops, but also fallow lands as revenue rates are assessed on the total cultivated area, including fallows. Hence the area stated in this column exceeds the total area in Table IV.

Columns 5 and 6 relate only to Khalsa area as statistics for these columns are not available for the whole area of the State.

The area leased out on condition of proprietary rights being given to lessees if they reclaimed land within a fixed term is returned as *zamindari—temporarily settled*, and the rest of the area (i.e., the area remaining after deduction of the *raiayatwari* and the temporarily-settled *zamindari* areas from the total area) is entered as *zamindari—permanently settled*.

Column 3 includes *musfi*, *chauth*, and *istamar* areas.

Column 6.—The population stated is that of the last census.

Column 11 shows the total population in cases where separate figures for areas fully and not fully assessed are not available.
